API Terms of Service

Version 1.12

Effective Date: March 15, 2026

These API Terms of Service ("API Terms") constitute a legally binding agreement between the entity or individual accessing the SentiSense API ("API Consumer," "Consumer," "you," or "your") and SentiSense Labs LLC doing business as SentiSense ("SentiSense," "we," "us," or "our").

Relationship to General Terms of Service. These API Terms supplement the SentiSense Terms of Service available at https://sentisense.ai/agreement/Terms-of-Service.pdf (the "General Terms"). By generating an API key, authorizing a connection to the SentiSense MCP server or another connector interface, or making any request to the SentiSense API, you agree to be bound by both the General Terms and these API Terms. In the event of a conflict between the General Terms and these API Terms with respect to API-related matters, these API Terms shall control.

By accessing or using the SentiSense API, you acknowledge that you have read, understood, and agree to be bound by these API Terms. If you are accessing the API on behalf of an organization, you represent and warrant that you have the authority to bind that organization to these API Terms.

---

1. Definitions

1.1 "API" means the SentiSense application programming interface, including all endpoints, methods, protocols, and associated documentation made available by SentiSense for programmatic access to the Service. The API includes access through the SentiSense MCP (Model Context Protocol) server and any other connector interface SentiSense makes available for programmatic or AI-assistant access to the Service, regardless of the authentication mechanism used.

1.2 "API Consumer" means any individual, entity, application, automated system, AI agent, or other software that accesses the API using valid API credentials.

1.3 "API Credentials" means API keys, tokens, or other authentication mechanisms issued by SentiSense to authorize access to the API.

1.4 "Derived Analytics" means all data, scores, classifications, metrics, insights, and analytical outputs generated by SentiSense through its proprietary algorithms, models, and analytical processes, including but not limited to: sentiment scores, entity extraction results, ticker associations, reliability scores, emotion classifications, engagement metrics, trend indicators, institutional flow analytics, insider trading analytics, congressional trading analytics, earnings analytics (including earnings summaries, call transcript summaries, filing change analysis, and guidance extraction), composite stock ratings and rankings (including the SentiSense Rating letter grade, its percentile, its per-dimension breakdown, and its anomaly flags), and any other analytical or computational output produced by SentiSense. Derived Analytics are the original intellectual work product of SentiSense.

1.5 "SentiSense Data" means Derived Analytics and the SentiSense Ontology together with any associated metadata provided through the API, including but not limited to timestamps, classification labels, confidence scores, and Source URLs.

1.6 "Source Content" means the original text, headlines, titles, images, multimedia, and other copyrightable content created by third-party publishers, authors, platforms, or users, from which SentiSense may derive its analytics. Source Content is not owned by SentiSense and is not provided through the API.

1.7 "Source URLs" means uniform resource locators referencing the original location of Source Content on third-party platforms or publisher websites. Source URLs are included in API responses as navigational references for attribution and source verification purposes.

1.8 "Upstream Platforms" means third-party content platforms, social media services, news publishers, and other sources from which SentiSense accesses publicly available or API-accessible content for the purpose of generating Derived Analytics. Upstream Platforms include, but are not limited to, X (formerly Twitter), Reddit, news publishers, and RSS content syndicators.

1.9 "Commercial Use" means any use of SentiSense Data in connection with a product, service, or activity intended to generate revenue, whether directly or indirectly.

1.10 "Service" means the SentiSense market intelligence platform, including the API, the SentiSense web application at sentisense.ai, and all related services, tools, and documentation.

1.11 "Consuming Application" means any software, application, agent, tool, or system operated by or on behalf of an API Consumer that accesses the API.

1.12 "SentiSense Ontology" means the curated reference compilation maintained by SentiSense and made available through the API, including entity records (companies, people, products, organizations, topics, and similar entities), the identifiers, slugs, and aliases assigned to them, the relationships and edges recorded between them, their categories and classification taxonomies, and the descriptions and summaries SentiSense authors for them. The SentiSense Ontology is selected, verified, structured, and edited by SentiSense. It is not Source Content, is not supplied by any Upstream Platform, and does not depend on any Upstream Platform for its existence. The SentiSense Ontology is distinct from the entity extraction results described in Section 1.4, which are the output of applying SentiSense models to Source Content.

---

2. Nature of Service

2.1 Analytical Intelligence Product. SentiSense is a financial intelligence and analytics platform. The Service applies proprietary natural language processing, machine learning, sentiment analysis, entity recognition, and other computational techniques to publicly available and API-accessible information to produce Derived Analytics. **The product SentiSense offers through its API is the analytical intelligence layer — the scores, classifications, entity mappings, sentiment determinations, reliability assessments, and other computational outputs that constitute SentiSense's original work product.** SentiSense does not offer, license, distribute, or make available Source Content through the API.

2.2 Transformative Nature of Derived Analytics. SentiSense Derived Analytics represent a fundamentally different product from the Source Content analyzed to produce them. Derived Analytics are the output of substantial computational processing, proprietary model inference, cross-source correlation, and analytical judgment. A sentiment score, entity extraction result, or reliability metric is not a reproduction, derivative work, or substitute for the underlying Source Content; it is an independent analytical conclusion about that content.

2.3 Source URLs as Navigational References. API responses may include Source URLs that reference the original location of content analyzed by SentiSense. These URLs are included solely as navigational aids to enable (a) proper attribution to original publishers and authors, (b) source verification by API Consumers, and (c) end-user access to original sources when desired. Source URLs are not the product; they are incidental metadata accompanying the analytical product.

2.4 No Content Distribution. SentiSense does not distribute, syndicate, license, cache, or make available the text, headlines, titles, images, or other copyrightable elements of Source Content through the API. API responses do not contain article text, tweet text, post titles, comment text, or other verbatim reproductions of Source Content.

2.5 Independent Analytical Work Product. Each element of Derived Analytics represents SentiSense's independent analytical determination. SentiSense's sentiment scores, entity classifications, and other outputs are not dictated by, copied from, or inherently linked to any single piece of Source Content. They represent the application of SentiSense's proprietary models and algorithms to information inputs.

2.6 Curated Reference Compilation. In addition to Derived Analytics, the API makes available the SentiSense Ontology: a reference compilation of entities, identifiers, relationships, and categories that SentiSense selects, verifies, structures, and edits through its own editorial process. The SentiSense Ontology is neither extracted
from nor licensed from Source Content or any Upstream Platform, and it is not a substitute for either. **The selection, coordination, and arrangement of the compilation, and the descriptive content SentiSense authors within it, are original to SentiSense and represent sustained investment in obtaining, verifying, and maintaining the compilation.**

3. License Grant

3.1 Limited License. Subject to your compliance with these API Terms, SentiSense grants you a limited, non-exclusive, non-transferable, non-sublicensable, revocable license to access and use SentiSense Data through the API for:

(a) Your internal business purposes, including financial research, market analysis, portfolio management, and risk assessment; or

(b) Integration into your own product or service, provided that such integration complies with the Downstream Use Restrictions set forth in Section 4 and all other provisions of these API Terms.

3.2 Scope of License. This license extends only to SentiSense Data as delivered through the API. No license is granted to Source Content, Upstream Platform content, or any other third-party intellectual property.

3.3 Reservation of Rights. All rights not expressly granted herein are reserved by SentiSense. This license does not convey any ownership interest in SentiSense Data, the API, or any SentiSense intellectual property.

3.4 Revocation. SentiSense may revoke this license at any time for any reason, including but not limited to violation of these API Terms, upon notice as set forth in Section 10.

3.5 Data License Plans. API Consumers subscribed to a SentiSense Data License plan also hold the rights set out in the SentiSense Data License Agreement at https://sentisense.ai/agreement/data-license/, including display of the licensed data to end users and its storage, which control over these API Terms for the data that agreement licenses.

---

4. Downstream Use Restrictions

4.1 Prohibited Uses. API Consumers shall not, and shall not permit any third party to:

(a) **Content Aggregation.** Use SentiSense Data, including Source URLs, to build, operate, or contribute to a headline aggregation service, news reader, content

database, article archive, or any product or service whose primary value proposition is the presentation of Source Content rather than analytical insights.

(b) **Content Reconstruction.** Attempt to extract, reconstruct, reverse-engineer, or derive original Source Content (including but not limited to article headlines, tweet text, post titles, or comment text) from SentiSense API responses, metadata, or Derived Analytics.

(c) **Misrepresentation of Product Nature.** Present, display, or market SentiSense Data in a manner that positions Source Content, rather than Derived Analytics, as the primary value of the API Consumer's product or service.

(d) **Raw Data Resale.** Resell, sublicense, redistribute, or make available raw SentiSense API data to third parties without material transformation or value-added integration. For purposes of this subsection, "material transformation" means the application of the Consumer's own analytical processes, models, or proprietary methodology that produces outputs meaningfully distinct from the raw API data.

(e) **Platform Terms Circumvention.** Use the API to circumvent, avoid, or undermine the terms of service, content policies, rate limits, or access restrictions of any Upstream Platform.

(f) **Systematic URL Harvesting.** Use Source URLs provided in API responses programmatically at scale to build a content database, headline index, or article archive that would constitute a substitute for the original source, for licensed content aggregation services, or for any product that systematically collects and displays Source Content.

(g) **False Attribution.** Present content fetched from Source URLs as SentiSense content, or in a manner that implies SentiSense has authorized, verified, licensed, or endorsed the display of such content.

(h) **Systematic Ontology Extraction.** Systematically extract, enumerate, crawl, or accumulate content from the SentiSense Ontology, whether in a single operation or incrementally over time, for the purpose of assembling a copy of the compilation or of a substantial portion of it. Substantial portions of the SentiSense Ontology may not be

redistributed, resold, published as a dataset, or otherwise made available to third parties, whether or not reformatted or merged with other data.

(i) **Competing Compilation.** Use the SentiSense Ontology to build, seed, populate, or train a competing entity database, knowledge base, or reference compilation, or any dataset or model intended to reproduce the selection, arrangement, or coverage of the SentiSense Ontology.

4.2 Permitted Integration. For the avoidance of doubt, the following uses are permitted:

(a) Displaying Derived Analytics (sentiment scores, entity tags, reliability metrics) in the Consumer's own products alongside the Consumer's independently sourced or licensed content.

(b) Providing Source URLs as clickable links to enable end-user navigation to original sources, consistent with standard web hyperlinking practices.

(c) Building analytical products, dashboards, reports, or tools that use Derived Analytics as an input to the Consumer's own analytical or decision-support processes.

(d) Combining SentiSense Derived Analytics with the Consumer's own data or third-party data that the Consumer has independently licensed.

(e) Querying entity records, identifiers, relationships, and categories on demand to power the features of a Consuming Application or the reasoning of an AI agent, including repeated and automated queries, within the Consumer's tier and rate limits.

(f) Caching content from the SentiSense Ontology for the operational needs of the Consuming Application, such as latency, cost, or availability, provided the cache serves that application and is not distributed or published as a dataset.

(g) Displaying or quoting individual entity records and data points in the Consumer's product. Attribution under Section 5.3 is optional.

---

5. Source Content and Attribution

5.1 No Source Content in API. SentiSense does not provide Source Content through the API. API responses contain Derived Analytics and associated metadata, including Source URLs, but do not contain the text, headlines, images, or other copyrightable elements of the original Source Content.

5.2 Attribution Obligations. When displaying or presenting SentiSense Data that references specific sources (via Source URLs or other identifiers), API Consumers must:

(a) Include the Source URL as a clickable hyperlink when technically feasible, to enable end-user access to the original source.

(b) Not remove, obscure, or modify Source URLs provided in API responses.

(c) Not state or imply that SentiSense is the author, publisher, or originator of referenced Source Content.

(d) Provide appropriate attribution to the original publisher or platform when displaying information derived from or referencing specific sources, in a manner consistent with standard journalistic and web attribution practices.

5.3 SentiSense Attribution. Attribution of Derived Analytics to SentiSense is optional and is not a condition of the license in Section 3. API Consumers who choose to attribute may use "Powered by SentiSense," "Sentiment data by SentiSense," or such other format as SentiSense may specify in its documentation or brand guidelines. Data License and Enterprise plans offer a reduced price for displayed attribution, as set out in their agreements.

---

6. Upstream Platform Compliance

6.1 Acknowledgment. API Consumer acknowledges that SentiSense Derived Analytics may be generated from analysis of content originating on third-party Upstream Platforms, including but not limited to X (formerly Twitter), Reddit, news publisher websites, and RSS syndication feeds.

6.2 Consumer Responsibility. API Consumer is solely responsible for ensuring that its use of SentiSense Data complies with the terms of service, content policies, developer agreements, and other applicable terms of all Upstream Platforms to the extent applicable to Consumer's activities. SentiSense's provision of Derived Analytics to Consumer does not constitute authorization to use those analytics in any manner that would violate Upstream Platform terms.

6.3 No SentiSense Liability for Consumer Compliance. SentiSense is not responsible for, and makes no representations regarding, API Consumer's compliance with Upstream Platform terms. SentiSense's own compliance with Upstream Platform terms covers SentiSense's access to and analysis of content; it does not extend to or cover Consumer's downstream use of SentiSense Data.

6.4 Platform-Specific Requirements. SentiSense may, from time to time, include platform-specific requirements or restrictions in its API documentation. Such requirements are incorporated into these API Terms by reference. Consumer's failure to comply with documented platform-specific requirements constitutes a violation of these API Terms.

6.5 Changes in Upstream Terms. If changes to Upstream Platform terms require SentiSense to modify, restrict, or discontinue certain data or features, SentiSense may do so upon reasonable notice. SentiSense shall not be liable for any loss or disruption resulting from such changes.

---

7. Intellectual Property

7.1 SentiSense Ownership of Derived Analytics. SentiSense owns all right, title, and interest in and to Derived Analytics, including all intellectual property rights therein. Derived Analytics constitute SentiSense's original work product, created through the application of SentiSense's proprietary algorithms, models, and analytical processes. Nothing in these API Terms transfers ownership of Derived Analytics to API Consumer.

7.2 Source Content Ownership. Source Content is and remains the property of its respective authors, publishers, and rights holders. Nothing in these API Terms grants API Consumer any intellectual property rights in Source Content. SentiSense does not

claim ownership of Source Content and does not purport to transfer any rights in Source Content to API Consumer.

7.3 API and Service IP. The API, including its design, architecture, documentation, and all associated software, is the proprietary property of SentiSense. Consumer shall not reverse engineer, decompile, or disassemble the API or any component thereof, except to the extent expressly permitted by applicable law.

7.4 Consumer Products. Subject to the rights and restrictions set forth herein, products and services independently created by API Consumer that incorporate SentiSense Data remain Consumer's property. This subsection does not grant Consumer any rights in SentiSense Data itself, the API, or SentiSense's intellectual property.

7.5 Feedback. If API Consumer provides suggestions, feature requests, bug reports, or other feedback regarding the API or Service ("Feedback"), SentiSense may use such Feedback without restriction or obligation. Consumer hereby assigns to SentiSense all right, title, and interest in any Feedback provided.

7.6 Ownership of the SentiSense Ontology. SentiSense owns all right, title, and interest in the SentiSense Ontology as a compilation, including the selection,
verification, coordination, and arrangement of its records and relationships, the identifiers and slugs it assigns, and the descriptions its editorial process produces. SentiSense does not claim ownership of individual publicly known facts.
Nothing in these API Terms transfers to API Consumer any interest in the compilation, and the restrictions in Sections 4.1(h) and 4.1(i) apply as contractual obligations regardless of whether any particular record within the compilation is separately protectable.

---

8. Data Accuracy and Financial Disclaimer

8.1 No Warranty of Accuracy. SentiSense Derived Analytics are computational outputs generated by automated analytical processes. SentiSense does not warrant the accuracy, completeness, reliability, timeliness, or fitness for any particular purpose of any Derived Analytics.

8.2 Not Financial Advice. SentiSense Data, including all Derived Analytics, is provided for informational and analytical purposes only. **Nothing in SentiSense Data constitutes financial advice, investment advice, trading advice, or any recommendation to buy, sell, or hold any security, financial instrument, or investment.** SentiSense is not a registered investment adviser, broker-dealer, or financial planner under the laws of any jurisdiction.

8.3 No Reliance. API Consumer acknowledges that Derived Analytics should not be the sole basis for any investment decision. Consumer assumes all risk associated with any use of SentiSense Data in connection with financial decisions.

8.4 Consumer Disclaimers. API Consumers that display SentiSense Data to end users must include a prominently displayed disclaimer substantially similar to the following: *"Sentiment data and analytics provided by SentiSense are for informational purposes only and do not constitute financial advice. Do not make investment decisions based solely on this data."*

8.5 Market Data Limitations. Derived Analytics may be based on delayed, incomplete, or sampled data. SentiSense does not guarantee real-time processing and makes no representation regarding the latency between Source Content publication and Derived Analytics availability.

8.6 Ratings, Scores, and Rankings. Certain Derived Analytics are expressed as scores, letter grades, percentiles, or rankings, including the SentiSense Score and the SentiSense Rating. The SentiSense Rating is a daily letter grade from A to F that is the band of a score from 0 to 100, delivered with that score, the percentile rank the score starts from, and the risk adjustments deducted from it; the rank compares a covered stock against the other stocks rated that day across seven families of public signals. Any such grade, score, percentile, or ranking is a relative measure derived from publicly available and third-party data that may be incomplete, delayed, or inaccurate. **It is not investment advice, not a recommendation to buy or sell any security, not a credit rating or an analyst rating, not an opinion about whether any security is suitable for any person, and not an offer or solicitation.** Past ratings, scores, and rankings do not predict future results, and the API Consumer and its end users are solely responsible for their own investment decisions. Section 8.4 applies to the display of any such grade, score, percentile, or ranking to end users.

---

9. Rate Limiting and Acceptable Use

9.1 Rate Limits. SentiSense reserves the right to impose, modify, and enforce rate limits on API access at its sole discretion. Current rate limits are published in the API documentation. SentiSense may modify rate limits with or without notice.

9.2 Acceptable Use. API Consumer shall not:

(a) Exceed documented rate limits or attempt to circumvent rate limiting mechanisms.

(b) Use the API in any manner that imposes an unreasonable or disproportionate load on SentiSense infrastructure.

(c) Engage in automated bulk extraction of SentiSense Data beyond the scope permitted by the Consumer's subscription tier and documented rate limits, or systematically enumerate the SentiSense Ontology across entity identifiers, slugs, tickers, or search results in order to assemble a copy of the compilation, at any rate of request and whether or not spread over time.

(d) Share, distribute, or publish API Credentials, or allow API Credentials to be used by unauthorized parties.

(e) Use the API for any unlawful purpose, including but not limited to market manipulation, insider trading, fraud, or any activity that violates applicable securities laws or regulations.

(f) Use the API to develop a competing product or service that replicates the core functionality of the SentiSense platform.

9.3 Monitoring. SentiSense may monitor API usage patterns to ensure compliance with these API Terms and to protect the integrity and availability of the Service.

---

10. Term and Termination

10.1 Term. These API Terms are effective upon your first access to the API and continue until terminated by either party.

10.2 Termination by Consumer. Consumer may terminate these API Terms at any time by ceasing all use of the API and deleting all API Credentials.

10.3 Termination by SentiSense for Cause. SentiSense may terminate or suspend API access:

(a) **Immediately**, without prior notice, for willful or material violations of Sections 4 (Downstream Use Restrictions), 6 (Upstream Platform Compliance), or 9.2 (Acceptable Use).

(b) **Upon thirty (30) days' written notice** for other violations of these API Terms, provided Consumer fails to cure the violation within such thirty-day period.

10.4 Termination by SentiSense Without Cause. SentiSense may terminate API access for any reason upon sixty (60) days' written notice.

10.5 Effect of Termination. Upon termination:

(a) All licenses granted herein immediately terminate.

(b) Consumer must immediately cease all use of the API and delete all API Credentials.

(c) Consumer may retain SentiSense Data already lawfully obtained prior to termination, subject to continued compliance with Sections 4, 5, and 7 of these API Terms.

(d) The following sections survive termination: Sections 1, 2, 4, 5, 7, 8, 11, 12, and 13.

---

11. Limitation of Liability

11.1 Disclaimer of Warranties. THE API AND SentiSense DATA ARE PROVIDED "AS IS" AND "AS AVAILABLE." SentiSense DISCLAIMS ALL WARRANTIES, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR
PURPOSE, ACCURACY, NON-INFRINGEMENT, AND ANY WARRANTIES ARISING FROM COURSE OF
DEALING OR USAGE OF TRADE.

11.2 Limitation of Damages. TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW,
IN NO EVENT SHALL SentiSense BE LIABLE FOR ANY INDIRECT, INCIDENTAL, SPECIAL, CONSEQUENTIAL, OR PUNITIVE DAMAGES, INCLUDING BUT NOT LIMITED TO LOSS OF PROFITS,
LOSS OF DATA, LOSS OF BUSINESS OPPORTUNITY, OR TRADING LOSSES, ARISING OUT OF OR
RELATED TO THESE API TERMS OR THE USE OF THE API, REGARDLESS OF THE THEORY OF LIABILITY
AND EVEN IF SentiSense HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

11.3 Liability Cap. SentiSense'S TOTAL AGGREGATE LIABILITY UNDER THESE API TERMS SHALL NOT EXCEED THE TOTAL FEES PAID BY API CONSUMER TO SentiSense IN THE TWELVE
(12) MONTHS IMMEDIATELY PRECEDING THE EVENT GIVING RISE TO THE CLAIM, OR ONE
HUNDRED DOLLARS ($100), WHICHEVER IS GREATER.

11.4 Essential Basis. The limitations and exclusions in this Section 11 apply regardless of whether a remedy fails of its essential purpose and constitute an essential element of the bargain between the parties.

---

12. Indemnification

12.1 Consumer Indemnification. API Consumer shall defend, indemnify, and hold harmless SentiSense and its officers, directors, employees, agents, and affiliates (collectively, "SentiSense Indemnitees") from and against any and all claims, demands, actions, damages, losses, liabilities, costs, and expenses (including reasonable attorneys' fees) ("Claims") arising out of or related to:

(a) Consumer's use of the API or SentiSense Data in violation of these API Terms.

(b) Consumer's violation of applicable law, including but not limited to securities laws, copyright law, and data protection law.

(c) Claims by Upstream Platforms, content owners, publishers, or other third parties arising from how Consumer displays, uses, processes, or distributes SentiSense Data, Source URLs, or any content fetched by Consumer from Source URLs.

(d) Consumer's Consuming Application, including any claims arising from the Consuming Application's interaction with end users or third-party systems.

(e) Any claim that Consumer's product or service infringes or misappropriates the intellectual property rights of any third party, to the extent such claim arises from Consumer's integration of SentiSense Data.

12.2 Indemnification Procedure. SentiSense shall provide prompt written notice of any Claim for which indemnification is sought, cooperate reasonably in the defense, and allow Consumer to control the defense and settlement of such Claim, provided that Consumer shall not settle any Claim in a manner that imposes obligations on SentiSense without SentiSense's prior written consent.

---

13. Governing Law and Dispute Resolution

13.1 Governing Law. These API Terms shall be governed by and construed in accordance with the laws of the State of California, without regard to its conflict of laws principles.

13.2 Arbitration. Any dispute, controversy, or claim arising out of or relating to these API Terms, or the breach, termination, or validity thereof, shall be finally resolved by binding arbitration administered by the American Arbitration Association ("AAA") under its Commercial Arbitration Rules then in effect. The arbitration shall be conducted by a single arbitrator in the State of California, or such other location as the parties may agree. The arbitrator's decision shall be final and binding, and judgment thereon may be entered in any court of competent jurisdiction.

13.3 Injunctive Relief. Notwithstanding Section 13.2, either party may seek temporary or preliminary injunctive relief in any court of competent jurisdiction to prevent irreparable harm pending the outcome of arbitration. SentiSense may seek injunctive relief to enforce Sections 4, 7, or 9 of these API Terms without the requirement of posting a bond, to the extent permitted by applicable law.

13.4 Class Action Waiver. All disputes shall be resolved on an individual basis. Neither party shall bring, or be entitled to participate in, any class action, class arbitration, or other representative proceeding.

13.5 Statute of Limitations. Any claim arising under these API Terms must be brought within one (1) year after the cause of action accrues, or it shall be permanently barred.

13.6 Relationship to the General Terms of Service. Use of the API is governed by these API Terms. Where a user is subject to both these API Terms and the SentiSense Terms of Service and the two documents conflict with respect to API access or API data, these API Terms control. For all other use of the Platform, the Terms of Service control.

---

14. Automated and Agent-Based Access

14.1 Applicability of Terms to Automated Systems. AI agents, bots, MCP (Model Context Protocol) tools, autonomous systems, and other automated software accessing the API are bound by the same terms and restrictions as human-directed applications. The automated nature of a Consuming Application does not diminish or modify any obligation under these API Terms.

14.2 Operator Responsibility. The entity that deploys, configures, operates, or maintains an automated Consuming Application is responsible for that application's compliance with these API Terms, including all Downstream Use Restrictions set forth in Section 4. This responsibility applies regardless of whether the automated system acts autonomously, semi-autonomously, or at the direction of an end user.

14.3 Independent Action on Source URLs. SentiSense API responses include Source URLs as navigational references (as described in Section 2.3). Any action taken by a Consuming Application to fetch, render, display, scrape, or otherwise process content from those Source URLs constitutes an independent action by the Consuming Application and its operator, occurring outside the scope of the SentiSense API. Such actions are solely the responsibility of the Consuming Application's operator and are not authorized, directed, or facilitated by SentiSense.

14.4 No Warranty for Source URL Content. SentiSense does not warrant, authorize, endorse, or assume liability for any content fetched by a Consuming Application from Source URLs provided in API responses. Consuming Applications that fetch or display content from Source URLs must independently comply with applicable copyright law, platform terms of service, the Digital Millennium Copyright Act, and all other relevant legal requirements.

14.5 Documentation as Description, Not Authorization. The API documentation, including but not limited to skill.md files, OpenAPI specifications, developer guides, and integration examples, describes the structure and capabilities of the API. Documentation describing standard web practices, potential integration patterns, or common use cases does not constitute authorization, inducement, or encouragement to access third-party content in any manner that would violate applicable law or third-party terms of service.

14.6 SentiSense-Authored AI Agent Skills. SentiSense may publish software artifacts known as "Skills" (including but not limited to SKILL.md files and similar agent-readable specifications) on third-party AI agent skill registries (e.g., ClawHub) or other distribution channels. Skills are a form of API documentation under Section 14.5 and describe how Consuming Applications and AI agents may interact with the API. Skills do not constitute investment advice, trading signals, personalized recommendations, or solicitations to buy or sell any security. Output produced by an AI agent that has installed or is otherwise following a SentiSense Skill is the independent work of that agent and the Consuming Application's operator, and is governed by the same disclaimers and limitations of liability set forth in these API Terms, the General Terms of Service, and the SentiSense AI Disclaimer. The operator of any Consuming Application that installs or uses a Skill is responsible for ensuring the Consuming Application's behavior complies with all applicable laws and these API Terms.

---

15. Client-Side Content Fetching Disclaimer

15.1 SentiSense's Analytical Focus. SentiSense's API is designed to deliver Derived Analytics. Source URLs are included as navigational references to enable attribution and source verification, consistent with standard web practices.

15.2 No Content Fetching by SentiSense. SentiSense does not fetch, cache, store, proxy, or redistribute content from Source URLs on behalf of API Consumers. API responses contain Derived Analytics and metadata only. Any content retrieval from Source URLs is performed by the Consuming Application at the direction of its operator or end user, using the Consuming Application's own infrastructure and network connections.

15.3 Consumer Obligations for Source URL Content. API Consumers who build applications that fetch, render, or display content from Source URLs are solely responsible for:

(a) Compliance with the terms of service and developer agreements of the source platform or publisher.

(b) Compliance with applicable copyright and intellectual property law, including the fair use factors codified at 17 U.S.C. § 107.

(c) Implementing appropriate rate limiting and access controls to avoid imposing unreasonable load on third-party servers.

(d) Respecting robots.txt directives, noindex/nofollow directives, and publisher access preferences.

(e) Ensuring their use is consistent with applicable licensing, fair use principles, or other legal authority for the reproduction or display of third-party content.

(f) Obtaining any required licenses or permissions from content owners or platforms.

15.4 SentiSense's Right to Modify Source URL Fields. SentiSense reserves the right to modify, redact, remove, or restrict Source URL fields in API responses at any time if required by legal obligation, court order, platform policy changes, content owner requests, or SentiSense's own risk assessment. Such modifications shall not constitute a breach of these API Terms or any service level commitment.

---

16. Miscellaneous

16.1 Entire Agreement. These API Terms, together with the General Terms and any applicable subscription agreement, order form, or service-specific addendum, constitute the entire agreement between the parties with respect to the subject matter hereof and supersede all prior or contemporaneous agreements, representations, and understandings relating to API access.

16.2 Amendment. SentiSense may amend these API Terms by posting updated API Terms on its website and providing notice to API Consumers via email, API response headers, or documentation updates. Continued use of the API after the effective date of amended API Terms constitutes acceptance. Material changes shall be communicated at least thirty (30) days in advance.

16.3 Severability. If any provision of these API Terms is held to be invalid, illegal, or unenforceable, the remaining provisions shall continue in full force and effect. The invalid provision shall be reformed to the minimum extent necessary to make it valid and enforceable while preserving the parties' original intent.

16.4 Waiver. The failure of either party to enforce any provision of these API Terms shall not constitute a waiver of that provision or of the right to enforce it at a later time.

16.5 Assignment. Consumer may not assign or transfer these API Terms or any rights hereunder without SentiSense's prior written consent. SentiSense may assign these API Terms in connection with a merger, acquisition, or sale of all or substantially all of its assets.

16.6 Notices. Notices to SentiSense shall be sent to support@sentisense.ai or such other address as SentiSense may designate. Notices to Consumer shall be sent to the email address associated with Consumer's API account.

16.7 Force Majeure. SentiSense shall not be liable for any failure or delay in performance due to causes beyond its reasonable control, including but not limited to acts of God, natural disasters, pandemics, government actions, internet service disruptions, or Upstream Platform outages or policy changes.

16.8 Independent Contractors. The parties are independent contractors. Nothing in these API Terms creates a partnership, joint venture, agency, or employment relationship.

16.9 Export Compliance. Consumer shall comply with all applicable export control laws and regulations in connection with its use of the API and SentiSense Data.

Schedule A: Current Rate Limits by Tier

Rate limits are subject to change. Refer to the current API documentation at sentisense.ai for the most up-to-date limits.

Tier	Requests/Month	Requests/Minute	Concurrent Connections
Free	1,000	30	2
PRO	Unlimited	300	20
Pro Max	Unlimited	1,500	20
Data License (Essentials or Premium)	Unlimited	2,000	20

MCP connector tool calls are metered against the same tier limits (Free: 1,000 tool calls per month at 30 per minute; PRO: unlimited monthly at 300 per minute; Pro Max: unlimited monthly at 1,500 per minute; Data License: unlimited monthly at 2,000 per minute) and are tracked in a rate-limit bucket
separate from REST API requests. Pro Max and Data License plans include every PRO feature and data depth listed below under PRO.

Certain endpoint families additionally tier the depth of the data returned by plan. Currently this applies to the Options Intelligence and Earnings Analysis APIs:

Options Intelligence API	Free	PRO
Per-stock dossiers	10 full responses/month, then a reduced headline preview	Unlimited
Market overview	Top 25 ranked rows	Full board
History window	1 year	Full available depth

Earnings Analysis API	Free	PRO
Per-stock earnings analysis	Structural preview of the most recent reported quarter: headline beat and miss figures, latest values for marquee KPIs, call summary topic lists, filing comparison ("What Changed") materiality labels, and guidance direction	Full call summaries, filing comparison detail, KPI history, and guidance figures
Quarter history	Most recent reported quarter only	Full available quarter history

Reduced responses are identified in the response envelope (`isPreview: true`). The current per-endpoint behavior is documented in the API documentation at sentisense.ai.
